

MINI INCUBATOR

with power adaptor

MINI INCUBATOR CONTAINS

- Qty. 1 mini incubator
- Qty. 1 power adaptor

Suitable for

- BACT Gram neg/pos, product number 201

The mini incubator can hold qty. 1 BACT test chip (not included)

The mini incubator controls the conditions around the BACT test chip by warming to 37 °C (body temperature) and any bacteria that was present in the milk when it was placed in the test chip will multiply.

The mini incubator requires very little space. A flashing LED indicates that power is connected and the incubator is operating. The incubator operates at room temperature (17–35 °C) and must be kept away from direct sunlight.

MINI INCUBATOR

with power adaptor

APPLICATION

Extracting the milk sample

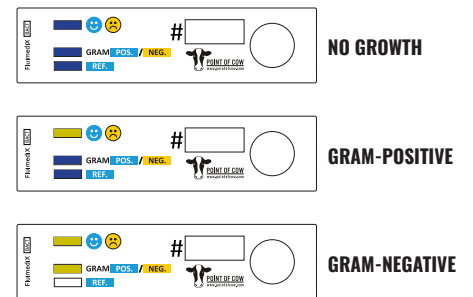

Applying the milk sample

Mini incubator
