INTRODUCING THE NEXT-GEN SPEEDRITE UNIGIZER™ RANGE

***Improved range to replace the
existing 10000 and 15000i Unigizers.™***

The new Speedrite Unigizer™ range is ideal for farmers that want a powerful three in one energizer with a robust design and intuitive interface.

With Bluetooth® and Wi-Fi compatibility, the Datamars Pro app* provides the ability to monitor and control the energizer from a phone.

Our new Unigizers connect to our new Datamars Pro app*, giving you alerts for your energizer and insights for other Datamars products.

With more power options, the new series allows mains only, battery only, battery with solar, or mains with battery back up.

LED indicators display output voltage for quick diagnostics.

Control and monitor via Bluetooth® and receive alerts when connected on Wi-Fi (requires internet connection)*.

Cyclic Wave™ delivers continuous power along the entire fence.

Robust split bolt terminals allow for the connection of multiple fence wires (as seen on our W-series mains energizer range).
